

ECI Satellite Symposium

A new era of T cell research

A joint symposium of the EFIS study group **TCCE** and the Innovative Training Network **ENLIGHT-TEN⁺**

Dublin, Ireland

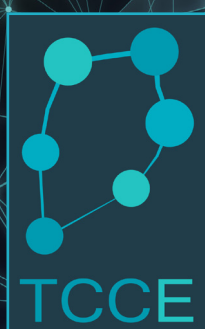

Convention Centre Dublin, Ireland

1 September 2024

9:30 am - 2 pm

Curious, how
bioinformatics
is enhancing
T cell biology?

Register here:
eci2024.org

Julie Ribot

Instituto de Medicina Molecular, Lisbon, Portugal
 $\gamma\delta$ T cells and tissue pathophysiology

Mirela Kuka

Università Vita-Salute San Raffaele, Milano, Italy
Spatiotemporal determinants shaping antiviral
CD4⁺ T cell responses

David Masopust

University of Minnesota, Minneapolis, USA
Memory CD8 T cells: issues of quantity, quality, and location

Axel Kallies

The University of Melbourne, Australia
Cytotoxic T cell differentiation in chronic infection and cancer

José A.M. Borghans

University Medical Center Utrecht, The Netherlands
Memories are made of this - A quantitative view on
immunological memory

David Zemmour

University of Chicago, USA
Advancing regulatory T cells biology in tissues: insights from
spatial and single-cell genomics

This event has received funding from EFIS and from the European Union's Horizon 2020 research and innovation programme under the Marie Skłodowska-Curie grant agreement No.: 955321
